Summary

Detail-oriented Software Developer with hands-on experience in the full SDLC and building multi-tier applications. Expert in the MERN stack and Django, with a proven track record of delivering professional-grade software modules and automating workflows that reduced manual entry by 90%. Skilled in designing scalable database schemas, and securing API endpoints. Passionate about contributing to cutting-edge AI-driven hiring technology and solving complex architectural challenges.

Skills

Core Subjects: Data Structures, Algorithms, OOPS, DBMS, Operating Systems, SDLC

Programming: C++, Python, JavaScript, TypeScript

Web Technologies: MERN Stack, Next.js, Redux Toolkit, Django, RESTful APIs, HTML, CSS

Databases/Tools: SQL, MySQL, MongoDB, Git, GitHub

Experience

Software Developer Intern

Dec 2025 – Jan 2026

Tooclarity – Remote | [Certificate](#)

- Developed responsive UIs using **Next.js** and **TypeScript**, ensuring high-performance rendering.
- Managed state with **Redux Toolkit**, reducing prop-drilling and improving data flow in complex modules.
- Integrated RESTful APIs for real-time dashboard updates and handled asynchronous data synchronization.
- Collaborated on UI/UX by translating wireframes into reusable React components and provided technical documentation.

Projects

QR Entry – Event Ticketing & Attendance Management System | *Python, Django, SQLite* | [GitHub](#) May 2025

- Developed a Django-based event ticketing and attendance management system with role-based access for participants and organisers.
- Implemented authentication, event creation, booking workflows, QR code generation and validation, PDF ticket downloads, and email-based ticket confirmation.
- Built searchable and paginated event listings, organiser booking views, and deployed the application on Render using Gunicorn and WhiteNoise.

EduSphere – Role-Based Enterprise Learning Platform | *MERN Stack* | [GitHub](#)

Sep 2025

- Architected a multi-tier MERN application designed for **hybrid cloud** deployment, delivering role-based dashboards.
- Integrated JWT middleware to enforce granular access control and secure API endpoints for enterprise use cases.
- Designed scalable MongoDB schemas to manage nested course structures, ensuring high data consistency and performance.

Certifications

- **Python for Data Science – NPTEL (IIT Madras)** | [Certificate](#)
- **Deloitte Technology Job Simulation – Forage** | [Certificate](#) (*June 2025*)

Education

B.Tech in Computer Science and Engineering

2022 – 2026

RGUKT, Srikakulam

CGPA: 9.05 / 10.0

PUC (MPC Equivalent)

2020 – 2022

RGUKT, Srikakulam

CGPA: 9.71 / 10.0

Class X (Secondary Education)

2019 – 2020

Narayana E-techno School, Palasa

CGPA: 10.0 / 10.0

Position of Responsibility

- **Hackathon Organizer** – RGUKT Srikakulam: Managed logistics and technical coordination for 200+ participants.
